

KEY STAGE 5 TIMETABLE

Students can

study a range of courses over two years. There are over 20 different A level and BTEC courses to choose from. Students can choose courses dependent on their aspirations, career and university preferences.

Students are expected

to choose 3 or 4 A level courses or a BTEC course that is equivalent to 3 A levels. In order to give students flexibility when choosing their post-16 options, it is possible for them to combine A levels with BTEC courses, if they so wish. All students are required to combine their subjects with work experience and an enrichment qualification such as VESPA, the Extended Project Qualification or the Certificate of Personal Effectiveness, each of which provides UCAS points in preparation for university. Furthermore, there are a range of other enrichment opportunities such as reading support or activities designed to develop student's personal development, leadership skills and readiness for life after sixth form.

When not in lessons

students have the option of working within the dedicated sixth form centre in either the common room or the study room. They also have daily access to a careers advisor who is based in the sixth form centre, as well as graduate mentors who visit the sixth form each week to provide support and assist with university applications.
